Dispensa TANDEM Unit

More storage space, better organised, better access.

Dispensa TANDEM offers a completely new potential for food storage - In a clever piece of engineering, the back shelf moves automatically towards the user as the door is opened. Kitchen users can check the contents at a glance and easily reach what they want.

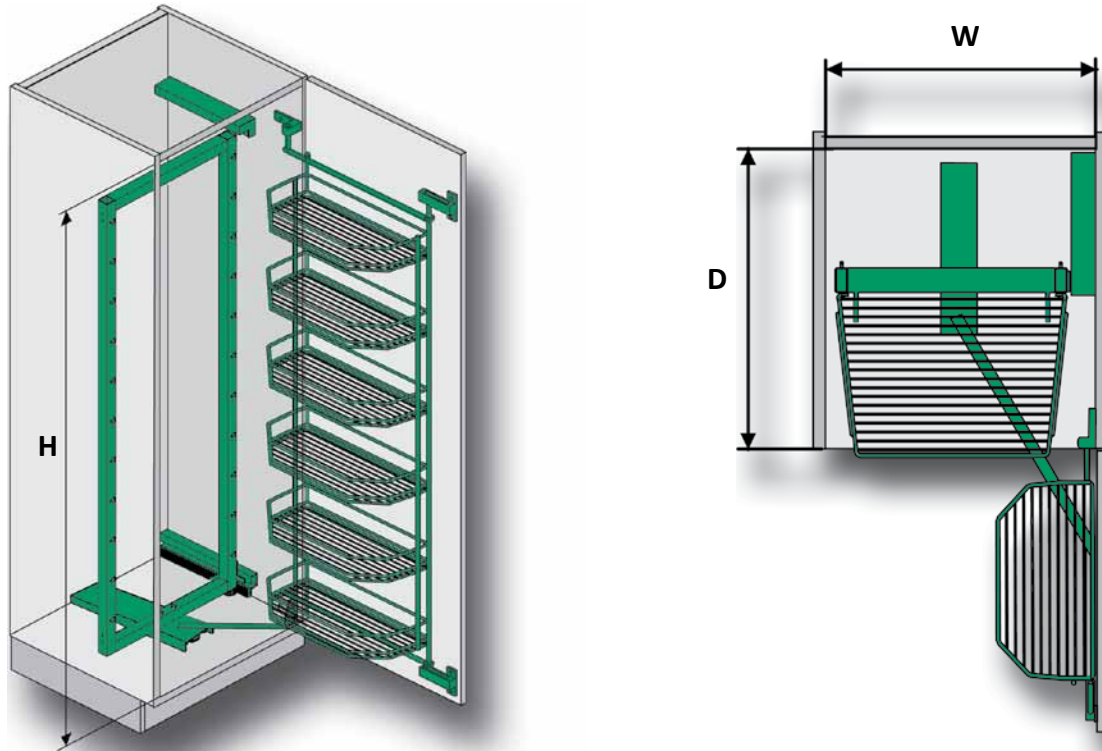

Dispensa TANDEM is supplied with SoftStopp dampening system to ensure gentle deceleration when closing. Dispensa TANDEM is designed to be installed opening to the left or right which ever suits the kitchen layout.

Quality engineering provides a total 50 kg storage on the back shelf with an additional 20 kg on the front. Weight capacities increase to 60 kg and 25 kg when installed in a 600 mm wide cabinet.

The baskets at the back of Dispensa TANDEM are all height adjustable. Simple and fast adjustment of the basket positions allows you to customise the Dispensa TANDEM to your unique needs. You can choose from two basket designs: ARENA Style comes with flat steel rails in polished chrome finish which surround a solid grey finish. Chrome high quality steel with superior strength in a polished chrome finish.

Dispensa TANDEM is available in two heights, Studio height is 1200 mm and Full height is 1700 mm. Both Studio and Full height options are available to suit cabinet widths of 450, 500 and 600 mm.
